- * Chris Ulewicz, Parent
- * Laurie Ames, Prevention Specialist

Every Number Tells a Story

Every day more than 192 people lose their lives to accidental overdoses from opioids. These drugs can be prescription painkillers, heroin, fentanyl or synthetic opioids. For many, this road began with a prescription given to them by a doctor for pain, injury or after surgery.

We invite you to participate in a panel discussion and join the conversation surrounding the issues our community faces and how we can move forward together to offer hope and help for those who need it most.

Families Against Narcotics (FAN) is a community based program for those seeking recovery, those in recovery, family members affected by addiction and community supporters. FAN seeks to change the face of addiction, dispel the stigma of addiction, and educate the community as well as those affected by addiction.

Please join us in the conversation.
